

# Chirp

## WHAT IS Chirp?

Chirp is an app that lets you send pictures, notes, and links to websites to anyone in the same room with the app open. Chirp is mainly for iPhone, but can be used on iPad. When two or more people have Chirp open, press Chirp and you can select what to send to others through Chirp's sound waves.

## HOW DOES Chirp SUPPORT LEARNING?

Teachers can use this app with their students to collect creative work off of the iPad. Kids can send their work that was saved to the Camera Roll to the teachers. This works great in elementary schools where students don't have access to an email account. Our teacher loves the fact that she can collect our work or send something out to our iPads in a snap! If our teacher wants to send something out to all of our iPads, we can all open Chirp and receive it at the same time.

Cost: Free

Let me show you how is easy this is!
