

Explain Everything

WHAT IS Explain Everything?

Explain Everything is an app where you can have several slides that you can draw, add text, import video or images and draw or write on, use laser pointers to draw attention, and record your thinking as you do these. You can export your finished video to YouTube, share on your website or blog, or share on the Promethean Board to show your learning and thinking to your class.

HOW DOES Explain Everything SUPPORT LEARNING?

This app is great because teachers can use it to record lessons and share it with their students. This is the Flipped Classroom model. Students view their teachers teaching the lesson and watch it at home and when they come to school they work on problems with their teacher. Students can answer detailed problems on Explain Everything and really explain their answer rather than turning in a worksheet. Teachers can use this as learning evidence at parent teacher conferences. This app can also be used as a digital storytelling tool.

Cost: \$2.99 (half price if you purchase more than 20)

Let me show you how is easy this is!
